

A COLLABORATIVE EFFORT – PATHWAYS TO SUCCESS

Join us at the Pasadena Conference Center and be part of the community that leads the way in making California's schools and higher education sector's amongst the leaders in driving the State's Sustainability goals. It takes more than one group and one person to move the needle in California. It is a collaborative effort, with those having success helping pave the way for others, sparking the theme for this year, "A Collaborative Effort - Pathways to Success!"

This year's Summit is being held on November 13th in Pasadena, California at the Pasadena Conference Center at 300 E Green Street, Pasadena CA 91101.

Hear from thought leaders and content experts in the State, in sustainability, school design and construction as well as experts in maintenance and operations from campuses across the State. Network with your peers and visit the expo where you can see many of the featured company solutions that are part of the Green Technology Sustainability Champions helping to forward the state's aggressive sustainability targets. Attend the Leadership Awards mixer and presentations and recognize this year's awardees in a variety of categories.

November 13th 2024
